

AMENDMENTS TO THE CLAIMS

Please cancel claims 1-81 without prejudice or disclaimer and add new claims 82-179 as follows. This listing of claims replaces all prior versions and listings of claims in the application:

Claims 1-83 (cancelled)

82. (New) A cosmetic lipcare and/or lip makeup composition comprising a dispersion, in a liquid fatty phase, of particles of a grafted ethylenic polymer, said polymer being chosen such that, when dispersed in a sufficient amount, said composition may form a deposit having a transfer of less than or equal to 35%.

83. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein when said composition forms a deposit, the deposit exhibits a transfer of less than or equal to 20%.

84. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein when said composition forms a deposit, the deposit exhibits a transfer of less than or equal to 5%.

85. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein said grafted ethylenic polymer comprises an ethylenic skeleton that is insoluble in said liquid fatty phase, and side chains that are covalently bound to said ethylenic skeleton and soluble in said liquid fatty phase.

86. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein said ethylenic composition is dispersed in the composition in the absence of an additional stabilizer at the surface of the particles.

87. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein said grafted ethylenic polymer is a grafted acrylic polymer.

88. (New) The cosmetic lipcare and/or lip makeup composition of claim 87, wherein said grafted acrylic polymer may be obtained by the free-radical polymerization in an organic polymerization medium:

- of at least one acrylic monomer and optionally of at least one additional non-acrylic vinyl monomer, to form a skeleton that is insoluble in said liquid fatty phase; and
- of at least one macromonomer, wherein said macromonomer:
 - comprises a polymerizable end group for forming side chains;
 - has a weight average molecular weight of at least 200; and
 - is present in the grafted acrylic polymer in an amount ranging from 0.05% to 20% by weight of the polymer.

89. (New) The cosmetic lipcare and/or lip makeup composition of claim 88, wherein said acrylic monomer is chosen, alone or in a mixture, from the following monomers and salts thereof:

- (i) (meth)acrylates of the formula:

in which:

- R_1 is chosen from a hydrogen atom and a methyl group;

- R_2 is chosen from:

- linear or branched $\text{C}_1\text{-C}_6$ alkyl groups, said alkyl groups optionally comprising in their chain at least one heteroatom chosen from O, N and S and/or at least one substituent chosen from -OH, halogen atoms, and $\text{NR}'\text{R}''$ groups, wherein R' and R'' , which may be the same or different, are chosen from linear or branched $\text{C}_1\text{-C}_4$ alkyls, and wherein said alkyl groups may be substituted with at least one polyoxyalkylene group comprising from 5 to 30 repeating oxyalkylene units;

- cyclic $\text{C}_3\text{-C}_6$ alkyl groups, optionally comprising in their chain at least one heteroatom chosen from O, N and S; and/or at least one substituent chosen from OH and halogen atoms;
and

- (ii) the (meth)acrylamides of the formula:

in which:

- R_3 is chosen from a hydrogen atom or a methyl group;

- R₄ and R₅ may be identical or different, and are chosen from a hydrogen atom and linear or branched C₁-C₆ alkyls, said C₁-C₆ alkyls optionally comprising at least one substituent chosen from -OH, halogen atoms, and NR'R'', wherein R' and R'' may be identical or different and are chosen from C₁-C₄ alkyls; or R₄ represents a hydrogen atom and R₅ represents a 1,1-dimethyl-3-oxobutyl group;
- (iii) (meth)acrylic monomers comprising at least one carboxylic acid, phosphoric acid, or sulfonic acid functionality;

and salts thereof.

90. (New) The cosmetic lipcare and/or lip makeup composition of claim 89, wherein the acrylic monomer is chosen from methyl, ethyl, propyl, butyl, isobutyl, methoxyethyl, ethoxyethyl, trifluoroethyl, dimethylaminoethyl, diethylaminoethyl, 2-hydroxypropyl, and 2-hydroxyethyl (meth)acrylates, methacrylic acid, dimethylaminopropyl methacrylamide, and salts thereof.

91. (New) The cosmetic lipcare and/or lip makeup composition of claim 88, wherein the acrylic monomer is chosen from methyl acrylate, methoxyethyl acrylate, methyl methacrylate, 2-hydroxyethyl methacrylate, dimethylaminoethyl methacrylate, and mixtures thereof.

92. (New) The cosmetic lipcare and/or lip makeup composition of claim 88, wherein the acrylic monomer is acrylic acid.

93. (New) The cosmetic lipcare and/or lip makeup composition of claim 88, wherein the acrylic monomer comprises (meth)acrylic acid.

94. (New) The cosmetic lipcare and/or lip makeup composition of claim 89, wherein the acrylic monomer comprises (meth)acrylic acid and at least one additional monomer chosen from:

- (i) (meth)acrylates of the formula:

in which:

- R_1 is chosen from a hydrogen atom and a methyl group;
- R_2 is chosen from:
 - linear or branched $\text{C}_1\text{-C}_6$ alkyl groups, said alkyl groups optionally comprising in their chain at least one heteroatom chosen from O, N and S and/or at least one substituent chosen from -OH, halogen atoms, and $\text{NR}'\text{R}''$ groups, wherein R' and R'' , which may be the same or different, are chosen from linear or branched $\text{C}_1\text{-C}_4$ alkyls, and wherein said alkyl groups may be substituted with at least one polyoxyalkylene group comprising from 5 to 30 repeating oxyalkylene units;
 - cyclic $\text{C}_3\text{-C}_6$ alkyl groups, optionally comprising in their chain at least one heteroatom chosen from O, N and S; and/or at least one substituent chosen from OH and halogen atoms;
- (ii) the (meth)acrylamides of the formula:

in which:

- R₃ is chosen from a hydrogen atom or a methyl group;
- R₄ and R₅ may be identical or different, and are chosen from a hydrogen atom and linear or branched C₁-C₆ alkyls, said C₁-C₆ alkyls optionally comprising at least one substituent chosen from -OH, halogen atoms, and NR'R'', wherein R' and R'' may be identical or different and are chosen from C₁-C₄ alkyls; or R₄ represents a hydrogen atom and R₅ represents a 1,1-dimethyl-3-oxobutyl group.

95. (New) The cosmetic lipcare and/or lip makeup composition of claim 88, wherein the acrylic monomer comprises (meth)acrylic acid and at least one monomer chosen from C₁-C₃ (meth)acrylates.

96. (New) The cosmetic lipcare and/or lip makeup composition of claim 93, wherein said (meth)acrylic acid is present in the composition in an amount of at least 5% by weight, relative to the total weight of the grafted acrylic polymer.

97. (New) The cosmetic lipcare and/or lip makeup composition of 96, wherein said (meth)acrylic acid is present in the composition in an amount ranging from 15% to 60% by weight, relative to the total weight of the grafted acrylic polymer.

98. (New) The cosmetic lipcare and/or lip makeup composition of claim 87, wherein the grafted acrylic polymer does not contain an additional non-acrylic vinyl monomer.

99. (New) The cosmetic lipcare and/or lip makeup composition of claim 88, wherein the grafted acrylic polymer may be obtained by the free-radical polymerization of at least one acrylic monomer, at least one additional non-acrylic vinyl monomer, and of said macromonomer.

100. (New) The cosmetic lipcare and/or lip makeup composition of claim 99, wherein said at least one additional, non-acrylic vinyl monomer is chosen from:

-vinyl esters of the formula: $R_6\text{-COO-CH=CH}_2$

in which R_6 is chosen from:

- a linear or branched $C_1\text{-C}_6$ alkyl group, a $C_3\text{-C}_6$ cyclic alkyl group, and an aromatic group;
- non-acrylic vinyl monomers comprising at least one functionality chosen from carboxylic acid, phosphoric acid, and sulphonic acid functionalities, and salts thereof;
- non-acrylic vinyl monomers comprising at least one tertiary amine functionality;
- and mixtures thereof.

101. (New) The cosmetic lipcare and/or lip makeup composition of claim 88, wherein the acrylic monomer is present in the mixture of said acrylic monomer and said optional non-acrylic, vinyl monomer in an amount ranging from 50% to 100% by weight, relative to the total weight of the mixture.

102. (New) The cosmetic lipcare and/or lip makeup composition of claim 101, wherein the acrylic monomer is present in the mixture of said acrylic monomer and said optional non-

acrylic, vinyl monomer in an amount ranging from 70% to 100% by weight, relative to the total weight of the mixture.

103. (New) The cosmetic lipcare and/or lip makeup composition of claim 88, wherein the macromonomer comprises, at one of the ends of the chain, a polymerizable end group chosen from a vinyl group and a (meth)acrylate group.

104. (New) The cosmetic lipcare and/or lip makeup composition of claim 88, wherein the weight average molecular weight of the macromonomer is greater than or equal to 300.

105. (New) The cosmetic lipcare and/or lip makeup composition of claim 104, wherein the weight average molecular weight of the macromonomer is greater than 600.

106. (New) The cosmetic lipcare and/or lip makeup composition of claim 105, wherein the macromonomer has a weight average molecular mass ranging from 300 to 100,000.

107. (New) The cosmetic lipcare and/or lip makeup composition of claim 106, wherein the macromonomer has a weight average molecular mass ranging from 800 to 6,000.

108. (New) The cosmetic lipcare and/or lip makeup composition of claim 88, wherein, after polymerization, the macromonomer is present in the grafted acrylic polymer in an amount ranging from 0.1% to 15% by weight, relative to the total weight of the grafted acrylic polymer.

109. (New) The cosmetic lipcare and/or lip makeup composition of claim 108, wherein after polymerization, the macromonomer is present in the grafted acrylic polymer in an amount ranging from 0.3% to 8% by weight, relative to the total weight of the grafted acrylic polymer.

110. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein the liquid fatty phase comprises a liquid organic compound chosen from liquid organic compounds having a total solubility parameter according to the Hansen solubility space of less than or equal to $18 \text{ (MPa)}^{1/2}$.

111. (New) The cosmetic lipcare and/or lip makeup composition of claim 110, wherein said liquid organic compounds have a total solubility parameter according to the Hansen solubility space of less than or equal to $17 \text{ (MPa)}^{1/2}$.

112. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein the liquid fatty phase comprises a liquid organic compound chosen from monoalcohols having a total solubility parameter according to the Hansen solubility space of less than or equal to $20 \text{ (MPa)}^{1/2}$.

113. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, further comprising a volatile oil.

114. (New) The cosmetic lipcare and/or lip makeup composition of claim 113, wherein said volatile oil is chosen from octamethylcyclotetrasiloxane, octamethyltrisiloxane, decamethyltrisiloxane, decamethylcyclopentasiloxane, dodecamethylcyclohexasiloxane, heptamethylhexyltrisiloxane, heptamethyloctyltetrasiloxane, isododecane, isodecane, isohehexadecane, and mixtures thereof.

115. (New) The cosmetic lipcare and/or lip makeup composition of claim 113, wherein the volatile oil is present in the composition in an amount ranging from 1% to 70% by weight, relative to the total weight of the composition.

116. (New) The cosmetic lipcare and/or lip makeup composition of claim 115, wherein the volatile oil is present in the composition in an amount ranging from 10% to 35% by weight, relative to the total weight of the composition.

117. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein said liquid fatty phase is a non-silicone-based liquid fatty phase.

118. (New) The cosmetic lipcare and/or lip makeup composition of claim 117, wherein the non-silicone-based liquid fatty phase comprises at least 50% by weight of at least one non-silicone-based organic liquid compound chosen from:

- non-silicone-based organic liquid compounds having a total solubility parameter according to the Hansen solubility space of less than or equal to $18 \text{ (MPa)}^{1/2}$;
- liquid monoalcohols having a total solubility parameter according to the Hansen solubility space of less than or equal to $20 \text{ (MPa)}^{1/2}$; and
- mixtures thereof.

119. (New) The cosmetic lipcare and/or lip makeup composition of claim 117, wherein the non-silicone-based liquid fatty phase comprises less than 50% by weight of silicone-based liquid organic compounds having a total solubility parameter according to the Hansen solubility space of less than or equal to $18 \text{ (MPa)}^{1/2}$.

120. (New) The cosmetic lipcare and/or lip makeup composition of claim 117, wherein the non-silicone-based liquid fatty phase does not comprise silicone-based liquid organic compounds.

121. (New) The cosmetic lipcare and/or lip makeup composition of claim 88, wherein said macromonomer is a carbon-based macromonomer.

122. (New) The cosmetic lipcare and/or lip makeup composition of claim 121, wherein the carbon-based macromonomer is chosen from:

- (i) linear or branched C₈-C₂₂ alkyl acrylate or methacrylate homopolymers and copolymers having a polymerizable end group chosen from vinyl or (meth)acrylate groups; and
- (ii) polyolefins having a polymerizable ethylenically unsaturated end group.

123. (New) The cosmetic lipcare and/or lip makeup composition of claim 122, wherein the carbon-based macromonomer is chosen from:

- (i) poly (2-ethylhexyl acrylate) macromonomers having a mono(meth)acrylate end group; poly(dodecyl acrylate) monomers having a mono(meth)acrylate end group; poly(dodecyl methacrylate) macromonomers; poly(stearyl acrylate) macromonomers having a mono(methacrylate) end group; and poly(stearyl methacrylate) macromonomers having a mono(meth)acrylate end group; and
- (ii) polyethylene macromonomers, polypropylene macromonomers, macromonomers of polyethylene/polybutylene copolymer; polyisobutylene macromonomers; polybutadiene macromonomers; polyisoprene macromonomers; poly(ethylene/butylene)polyisoprene macromonomers; and macromonomers having a (meth)acrylate end group.

124. (New) The cosmetic lipcare and/or lip makeup composition of claim 123, wherein the carbon-based macromonomer is chosen from:

- (i) poly(2-ethylhexyl acrylate) macromonomers having a mono(meth)acrylate end group, and poly(dodecyl acrylate) macromonomers having a mono(meth)acrylate end group; or
- (ii) poly(ethylene/butylene) methacrylate.

125. (New) The cosmetic lipcare and/or lip makeup composition of claim 124, wherein the grafted acrylic polymer is chosen from polymers obtained by the polymerization:

- of methyl acrylate and of a polyethylene/polybutylene macromonomer having a methacrylate end group;
- of methoxyethyl acrylate and of a polyethylene/polybutylene macromonomer containing a methacrylate end group;
- of methyl acrylate/methyl methacrylate monomers and of a polyethylene/polybutylene macromonomer containing a methacrylate end group;
- of methyl acrylate/acrylic acid monomers and of a polyethylene/polybutylene macromonomer containing a methacrylate end group;
- of methyl acrylate/dimethylaminoethyl methacrylate monomers and of a polyethylene/polybutylene macromonomer containing a methacrylate end group; and
- of methyl acrylate/2-hydroxyethyl methacrylate monomers and of a polyethylene/polybutylene macromonomer containing a methacrylate end group.

126. (New) The cosmetic lipcare and/or lip makeup composition of claim 117, wherein the grafted ethylenic polymer is a non-silicone-based grafted polymer.

127. (New) The cosmetic lipcare and/or lip makeup composition of claim 126, wherein the non-silicone based grafted polymer contains a carbon-based macromonomer and optionally 7% by weight or less of a silicone-based macromonomer.

128. (New) The cosmetic lipcare and/or lip makeup composition of claim 126, wherein the non-silicone-based grafted polymer is free of silicone-based macromonomer.

129. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein the liquid fatty phase is a silicone-based liquid fatty phase.

130. (New) The cosmetic lipcare and/or lip makeup composition of claim 129, wherein the silicone-based liquid fatty phase comprises at least 50% by weight of at least one silicone-based organic liquid compound chosen from silicone-based liquid compounds having a total solubility parameter according to the Hansen solubility space of less than or equal to 18 (MPa)^{1/2}.

131. (New) The cosmetic lipcare and/or lip makeup composition of claim 129, wherein the silicone-based organic liquid compound comprises a volatile silicone oil.

132. (New) The cosmetic lipcare and/or lip makeup composition of claim 131, wherein the volatile silicone oil is chosen from octamethylcyclotetrasiloxane, decamethylcyclopentasiloxane, dodecamethylcyclohexasiloxane, heptamethylhexyltrisiloxane, heptamethyloctyltrisiloxane, octamethyltrisiloxane, decamethyltetrasiloxane, and mixtures thereof.

133. (New) The cosmetic lipcare and/or lip makeup composition of claim 130, wherein the silicone based organic liquid compound comprises a non-volatile silicone oil.

134. (New) The cosmetic lipcare and/or lip makeup composition of claim 133, wherein the non-volatile silicone oil is chosen from non-volatile polydialkylsiloxanes; polydimethylsiloxanes comprising pendant or terminal C₂-C₂₄ alkyl, alkoxy, or phenyl groups; phenyl silicones; polysiloxanes modified with fatty acids, fatty alcohols, or polyoxyalkylenes; amino polysiloxanes; polysiloxanes containing hydroxyl groups; fluoro polysiloxanes comprising a pendant or terminal C₁-C₁₂ group that is at least partially fluorinated; and mixtures thereof.

135. (New) The cosmetic lipcare and/or lip makeup composition of claim 133, wherein the liquid fatty phase contains less than 50% by weight of non-silicone-based liquid organic compounds.

136. (New) The cosmetic lipcare and/or lip makeup composition of claim 135, wherein the non-silicone-based organic liquid compound having a total solubility parameter according to the Hansen solubility space of less than or equal to 18 (MPa)^{1/2} is chosen from: carbon-based oils, hydrocarbon-based oils, fluoro oils, and mixtures thereof; volatile or non-volatile, linear, branched, and cyclic alkanes; esters; ketones; and ethers.

137. (New) The cosmetic lipcare and/or lip makeup composition of claim 136, wherein said esters are chosen from linear, branched, or cyclic esters comprising at least 6 carbon atoms; said ketones comprise at least 6 carbon atoms; and said ethers comprise at least 6 carbon atoms.

138. (New) The cosmetic lipcare and/or lip makeup composition of claim 118, wherein said monoalcohols having a total solubility parameter according to the Hansen solubility space

of less than or equal to 20 (MPa)^{1/2} are chosen from C₆ to C₃₀ aliphatic fatty monoalcohols having an unsubstituted carbon hydrocarbon chain.

139. (New) The cosmetic lipcare and/or lip makeup composition of claim 138, wherein said monoalcohols are chosen from oleyl alcohol, octyldodecanol; decanol, and linoleyl alcohol.

140. (New) The cosmetic lipcare and/or lip makeup composition of claim 129, wherein the liquid fatty phase contains no non-silicone-based liquid organic compounds.

141. (New) The cosmetic lipcare and/or lip makeup composition of claim 129, wherein said macromonomer is a silicone-based macromonomer.

142. (New) The cosmetic lipcare and/or lip makeup composition of claim 141, wherein the silicone-based macromonomer is an organopolysiloxane macromonomer.

143. (New) The cosmetic lipcare and/or lip makeup composition of claim 142, wherein said silicone-based macromonomer is a polydimethylsiloxane macromonomer.

144. (New) The cosmetic lipcare and/or lip makeup composition of claim 142, wherein said silicone-based macromonomer is chosen from macromonomers of the formula:

in which:

- R₈ is chosen from a hydrogen atom and a methyl group;

- R₉ is a divalent C₁-C₁₀ hydrocarbon group that optionally contains one or two ether bonds -O-;
- R₁₀ is a C₁-C₁₀ alkyl group; and
- n is an integer ranging from 1 to 300.

145. (New) The cosmetic lipcare and/or lip makeup composition of claim 142, wherein the grafted acrylic polymer is obtainable by free-radical polymerization in a polymerization medium, wherein said polymerization medium comprises:

- an acrylic monomer chosen from at least one C₁-C₃ (meth)acrylates and optionally at least one additional acrylic monomer chosen from acrylic acid, methacrylic acid, and alkyl (meth)acrylates of the formula:

wherein:

- R'₁ is chosen from a hydrogen atom and a methyl group
- R'₂ is chosen from:
 - a linear or branched C₁-C₆ alkyl group comprising in its chain at least one oxygen atom and/or at least one substituent chosen from OH, halogen atoms, and NR'R'' groups, where R' and R'' may be identical or different and are chosen from C₁-C₃ linear or branched alkyls; and

- a cyclic C₃-C₆ alkyl group having a chain that optionally comprises in its chain at least one oxygen atom and/or at least one substituent chosen from OH and halogen atoms; and salts thereof, to form a skeleton that is insoluble in said liquid fatty phase; and
- a silicone-based macromonomer.

146. (New) The cosmetic lipcare and/or lip makeup composition of claim 145, wherein R'₂ is chosen from methoxyethyl, ethoxyethyl, trifluoroethyl, 2-hydroxyethyl, 2-hydroxypropyl, dimethylaminoethyl, diethylaminoethyl, and dimethylaminopropyl groups.

147. (New) The cosmetic lipcare and/or lip makeup composition of claim 145, wherein said acrylic monomer is chosen from methyl (meth)acrylate, ethyl (meth)acrylate, n-propyl (meth)acrylate, isopropyl (meth)acrylate, and mixtures thereof.

148. (New) The cosmetic lipcare and/or lip makeup composition of claim 145, wherein said acrylic monomer is chosen from methyl acrylate, methyl methacrylate, ethyl acrylate, and mixtures thereof.

149. (New) The cosmetic lipcare and/or lip makeup composition of claim 145, wherein said at least one additional acrylic monomer is chosen from (meth)acrylic acid, methoxyethyl (meth)acrylate, ethoxyethyl (meth)acrylate, trifluoroethyl (meth)acrylate, dimethylaminoethyl (meth)acrylate, diethylamino (meth)acrylate, 2-hydroxypropyl (meth)acrylate, 2-hydroxyethyl (meth)acrylate, and salts thereof.

150. (New) The cosmetic lipcare and/or lip makeup composition of claim 149, wherein said at least one additional acrylic monomers is chosen from acrylic acid and methacrylic acid.

151. (New) The cosmetic lipcare and/or lip makeup composition of claim 140, wherein said macromonomer is chosen from polydimethylsiloxanes containing a mono(meth)acrylate end group.

152. (New) The cosmetic lipcare and/or lip makeup composition of claim 151, wherein said macromonomer is chosen from monomethacryloyloxypropyl polydimethylsiloxanes.

153. (New) The cosmetic lipcare and/or lip makeup composition of claim 126, wherein said grafted ethylenic polymer is a grafted acrylic polymer that is chosen from:

- polymers obtained by polymerization of methyl acrylate and a monomethacryloyloxypropyl polydimethylsiloxane macromonomer having a weight-average molecular weight ranging from 800 to 6000; and
- polymers obtained by polymerization of methyl acrylate, acrylic acid, and a monomethacryloyloxypropyl polydimethylsiloxane macromonomer having a weight average molecular weight ranging from 800 to 6000.

154. (New) The cosmetic lipcare and/or lip makeup composition of claim 153, wherein said monomethacryloyloxypropyl polydimethylsiloxane macromonomer is chosen from decamethylcyclopentasiloxane or phenyl trimethicone.

155. (New) The cosmetic lipcare and/or lip makeup composition of claim 153, wherein said grafted ethylenic polymer is a silicone-based grafted polymer.

156. (New) The cosmetic lipcare and/or lip makeup composition of claim 155, wherein the silicone-based grafted polymer is free of carbon-based macromonomer.

157. (New) The cosmetic lipcare and/or lip makeup composition of claim 155, wherein the silicone-based grafted polymer comprises predominantly a silicone-based macromonomer and optionally comprises 7% or less by weight of carbon-based macromonomer.

158. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein said grafted ethylenic polymer has a weight-average molecular mass ranging from 10,000 to 300,000.

159. (New) The cosmetic lipcare and/or lip makeup composition of claim 158, wherein said grafted ethylenic polymer has a weight-average molecular mass ranging from 25,000 to 150,000.

160. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein said particles of grafted ethylenic polymer have an average size ranging from 10 to 400 nm.

161. (New) The cosmetic lipcare and/or lip makeup composition of claim 160, wherein said particles of grafted ethylenic polymer have an average size ranging from 20 to 200 nm.

162. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein said grafted ethylenic polymer is a film-forming polymer.

163. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, further comprising at least one pulverulent colorant chosen from pigments, nacles, other fillers having an optical effect, and mixtures thereof.

164. (New) The cosmetic lipcare and/or lip makeup composition of claim 163, wherein the grafted ethylenic polymer comprises an ethylenic skeleton that is insoluble in said liquid

fatty phase, and side chains that are covalently bound to said skeleton and soluble in said liquid fatty phase.

165. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein the grafted ethylenic polymer is present in the composition, in terms of solid content amount, in an amount ranging from 1% to 66.5% by weight, relative to the total weight of the composition.

166. (New) The cosmetic lipcare and/or lip makeup composition of claim 165, wherein the grafted ethylenic polymer is present in the composition, in terms of solid content amount, in an amount ranging from 8 to 40% by weight.

167. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, further comprising from 0.1 to 50% by weight of at least one wax, relative to the total weight of the composition.

168. (New) The cosmetic lipcare and/or lip makeup composition of claim 167, wherein said composition comprises 1 to 30% by weight of at least one wax, relative to the total amount of the composition.

169. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, further comprising at least one cosmetic ingredient chosen from vitamins, trace elements, softeners, sequesterants, perfumes, alkalifying or acidifying agents, preservatives, surfactants, sunscreens, antioxidants and mixtures thereof.

170. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein said composition is in the form of a paste or a stick.

171. (New) The cosmetic lipcare and/or lip makeup composition of claim 82, wherein said composition is in anhydrous form.

172. A cosmetic assembly comprising:

- a container delimiting at least one compartment;
- a closing member for closing the container; and
- a composition disposed within said at least one compartment, said composition comprising a dispersion of particles of a grafted ethylenic polymer in a liquid fatty phase, said polymer being chosen such that, when dispersed in a sufficient amount, said composition may form a deposit having a transfer of less than or equal to 35%.

173. (New) The cosmetic assembly of claim 172, wherein said container is at least partially formed of at least one thermoplastic material.

174. (New) The cosmetic assembly of claim 172, wherein said container is at least partially formed of at least one non-thermoplastic material.

175. (New) The cosmetic assembly of claim 174, wherein said non-thermoplastic material is glass or metal.

176. (New) The cosmetic assembly of claim 172, wherein, with the container in a closed position, said closing member is coupled to said container via at least one screw.

177. (New) The cosmetic assembly of claim 172, wherein, with the container in a closed position, said closing member is coupled to said container other than by screws.

178. (New) The cosmetic assembly of claim 177, wherein said closing member is coupled to said container via snap-fastening, adhesive bonding, or welding.

179. (New) A method for making up or non-therapeutically treating the lips, comprising:

- providing a composition comprising a dispersion of particles of a grafted ethylenic polymer in a liquid fatty phase, said polymer being chosen such that, when dispersed in sufficient amount, said composition may form a deposit having a transfer of less than or equal to 35%; and
- applying said composition to the lips.

180. (New) A method for providing a non-transfer deposit on the lips, said method comprising:

- providing a composition comprising a dispersion of particles of a grafted ethylenic polymer in a liquid fatty phase, said polymer being chosen such that, when dispersed in sufficient amount, said composition may form a deposit having a transfer of less than or equal to 35%; and
- applying said composition to the lips.
